ICAO'S TERMINOLOGY DATABASE (ICAOTERM) IS NOW PART OF UNTERM

1. ICAO is upgrading its business tools as part of the Transformational Objective. In this regard, ICAO is pleased to announce the roll-out of UNTERM in July 2023, one of the four tools to be implemented under the Language Services Management System (LSMS) project, a signature project of ICAO's Digital Transformation. Designed by the UN Secretariat, this tool provides a more user-friendly interface for ICAO terminology and is rich with features that will enhance users' experience.
2. UNTERM is a multilingual database for official terminology relevant to the work of the United Nations. It contains entries from organizations across the UN system in the six ICAO official languages (Arabic, Chinese, English, French, Russian and Spanish), in line with ICAO's policy and mandate on multilingualism. ICAO has officially moved its terminology records to UNTERM, and ICAO terminology is now an integral part of UNTERM. Therefore, effective immediately, ICAOTerm is no longer updated and is decommissioned. ICAO remains the owner of its terminology database, which will be managed by the Terminology Officer.
3. UNTERM is hosted on a public website with open access without an account at <https://unterm.un.org/unterm2/en>. For ICAONET users, the link for terminology will be modified accordingly to redirect to UNTERM's public website.
4. To restrict search on UNTERM to ICAO terminology only, click on "Advanced search" and select ICAO under "All data sets".

Issued under the authority of the Secretary General
